

ELECTRIC RING USER MANUAL

The electric ring uses advanced remote control technology and supports five modes: electric shock, vibration, sound, lighting of the electric ring, and illumination. It is suitable for SM/BDSM erotic control. The product is USB rechargeable and universally compatible, with a maximum remote control range of up to 300 meters (in an interference-free environment).

Packaging contents:

- 1 x Electric Ring
- 1 x Remote Control
- 1 x Charger
- 1 x Charging Cable
- 1 x Adjustable Strap
- 1 x Diode

MAIN FEATURES

Multi-function Modes: Supports five modes: electric shock, vibration, sound, electric ring lighting, and illumination. Modes can be adjusted according to needs.

Smart Adjustment: The electric shock and vibration modes are adjustable from 0 to 100 levels. It is recommended to gradually increase the levels during use.

Waterproof Design: The electric ring is waterproof, but not suitable for swimming or diving.

Long-distance Remote Control: In an unobstructed environment, the remote control range can reach up to 300 meters.

Energy-saving Design: The remote control automatically enters standby mode after 3 minutes of inactivity, and the electric ring saves power after 15 seconds of inactivity.

Suitable for Multiple Areas: Can be used on the penis, scrotum, neck, legs, arms, and other areas.

INSTRUCTIONS FOR USE

1. Remote Control Operation

LCD Screen: Displays the mode status for electric shock, vibration, sound, electric ring lighting, etc.

1/2 Button Switch: One remote control can control two electric rings simultaneously. Press 1 to control the first ring, press 2 to control the second.

Handrest Button: Lighting button

Y Button: Activation button

Mode Button: Switch between 4 modes (electric shock, vibration, sound, electric ring lighting).

Up/Down Buttons: Press "▲" or "▼" to adjust the intensity of vibration and electric shock.

Remote Control Range: Effective within a 300-meter range, but obstacles may affect the signal.

Power-saving Mode: Automatically shuts off after 3 minutes of inactivity.

2. Electric Ring Operation

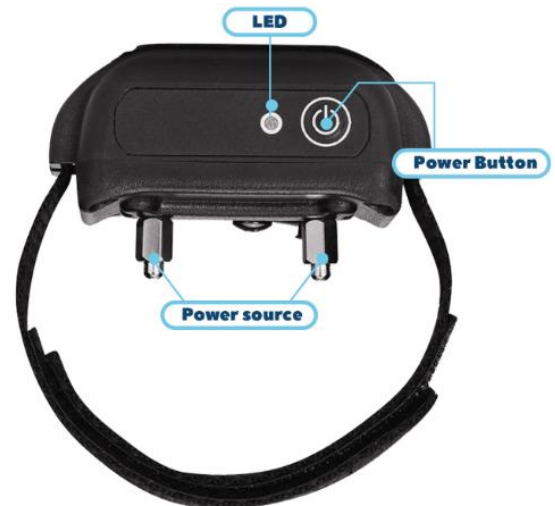

Power On/Off: Press the power button to turn the device on, and press again to turn it off.

Pairing: After turning on, press and hold the power button until the green light flashes. Within 10 seconds, press the "Y" button on the remote control to complete the pairing.

Diode Included: A diode is included to visually test the strength of the electric shock. Place the diode on the two screws of the electric ring. Set the remote control to electric shock mode, then press the "Y" button. You will see the diode light up.

Wearing Method: Thread the strap through the grooves on both sides of the ring, then secure it tightly to the skin by fastening the buckle. The tightness of the ring should allow for one finger to fit between the ring and the skin.

Automatic Power-saving: The device will automatically enter standby mode after 15 seconds of inactivity and will wake up automatically when in use.

3. Charging Instructions

Charging Time: It takes 1-2 hours to fully charge. Do not overcharge.

Low Battery Warning: When the battery is low, the receiver will emit a warning sound.

Charging Method: USB charging. A single charging cable can charge both devices simultaneously and is compatible with global power standards.

IMPORTANT NOTES

First Use: It is recommended to start at the lowest setting and gradually adjust to a comfortable level.

Waterproof Limitations: The product is splash-proof but should not be submerged in water.

Storage and Maintenance: When not in use for extended periods, turn off the device and store it in a dry place.
